Table of Contents

LIST OF TABLES	xii
LIST OF FIGURES	xv
ACKNOWLEDGEMENTS	xvii
CHAPTER 1 INTRODUCTION	1-1
1.1 SCOPE OF VOLUME 1	1-3
1.2 OVERVIEW OF VOLUME 1.....	1-3
1.3 METHODS FOR PREPARING AND REVIEWING VOLUME 1.....	1-7
1.4 PUBLIC INVOLVEMENT PROCESS FOR VOLUME 1	1-8
1.4.1 Public Involvement Process	1-8
1.4.2 Current Public Review Process	1-8
1.5 CONCLUSIONS	1-9
CHAPTER 2 WETLANDS IN WASHINGTON & HOW THEY FUNCTION....	2-1
2.1 READER'S GUIDE TO THIS CHAPTER.....	2-1
2.1.1 Chapter Contents	2-1
2.1.2 Where to Find Summary Information and Conclusions.....	2-2
2.1.3 Data Sources and Data Gaps	2-2
2.2 INTRODUCTION AND BACKGROUND ON WETLAND FUNCTIONS	2-3
2.2.1 An Evolving Understanding of Wetland Functions	2-3
2.2.2 How Wetland Functions Are Defined	2-4
2.2.3 Environmental Factors that Control Wetland Functions	2-7
2.2.3.1 Controls of Functions at the Scale of the Contributing Basin to the Wetland	2-9
2.2.3.2 Controls of Functions at the Site of the Wetland	2-12
2.2.3.3 Summary of the Controls of Wetland Functions.....	2-12
2.2.4 Summary of Key Points.....	2-14
2.3 CLASSIFICATION OF WETLANDS IN WASHINGTON AS A KEY TO UNDERSTANDING THEIR FUNCTIONS	2-15
2.3.1 Commonly Used Classification Systems in Washington.....	2-15
2.3.2 Geographical Differences in Wetland Functions	2-17
2.3.3 Wetland Regions in Washington	2-18
2.3.4 Description of the Wetland Classes for Washington.....	2-20
2.3.4.1 Riverine Wetlands	2-20
2.3.4.2 Depressional Wetlands	2-21
2.3.4.3 Slope Wetlands.....	2-22
2.3.4.4 Lacustrine Fringe (Lake-Fringe) Wetlands	2-23
2.3.4.5 Flats Wetlands	2-24

2.3.4.6 Tidal Fringe Wetlands.....	2-24
2.3.5 Subclasses of Wetlands in Washington.....	2-24
2.3.6 Summary of Key Points.....	2-25
2.4 OVERVIEW OF WETLAND FUNCTIONS IN WASHINGTON STATE	2-26
2.4.1 Functions Related to Improving Water Quality	2-26
2.4.2 Functions Related to Maintaining the Water Regime in a Watershed (Hydrologic Functions)	2-27
2.4.3 Functions Related to Habitat	2-27
2.4.4 Summary of Key Points	2-28
2.5 HOW WETLANDS PERFORM FUNCTIONS IN WASHINGTON STATE	2-28
2.5.1 Functions that Improve Water Quality.....	2-29
2.5.1.1 Removing Sediment	2-30
2.5.1.2 Removing Phosphorus.....	2-33
2.5.1.3 Removing Nitrogen	2-35
2.5.1.4 Removing Metals and Toxic Organic Compounds	2-37
2.5.2 Functions Related to Maintaining the Water Regime in a Watershed (Hydrologic Functions)	2-39
2.5.2.1 Reducing Peak Flows	2-40
2.5.2.2 Decreasing Downstream Erosion	2-43
2.5.2.3 Recharging Groundwater	2-45
2.5.3 Functions Related to Habitat.....	2-46
2.5.3.1 Characteristics that Make Wetlands Important as Habitat.....	2-47
2.5.3.2 Use of Wetlands by Vertebrates in Washington	2-51
2.5.3.3 Habitat Requirements of Some Wetland-Dependent Species in Washington	2-53
2.5.3.4 Habitat for Plants.....	2-60
2.5.3.5 Supporting Food Webs (Primary Production and Export)	2-61
2.5.4 Summary of Key Points.....	2-61
2.6 CHAPTER SUMMARY AND CONCLUSIONS	2-62

CHAPTER 3 ENVIRONMENTAL DISTURBANCES CAUSED BY DIFFERENT HUMAN ACTIVITIES AND USES OF THE LAND	3-1
3.1 READER'S GUIDE TO THIS CHAPTER	3-1
3.1.1 Chapter Contents	3-1
3.1.2 Where to Find Summary Information and Conclusions.....	3-2
3.1.3 Data Sources and Data Gaps	3-3
3.2 OVERVIEW OF HUMAN-CAUSED DISTURBANCES AT THE LANDSCAPE SCALE	3-3
3.2.1 The Link between Wetland Functions, Human Land Uses, and Changes in Wetland Ecosystems	3-3
3.2.2 Types of Disturbances Resulting from Human Land Uses	3-5
3.2.3 General Disturbances to the Movement of Water at the Landscape Scale	3-6
3.2.3.1 Movement of Water in Undisturbed Landscapes.....	3-8
3.2.3.2 Movement of Water in Disturbed Landscapes	3-9

3.2.3.3	Thresholds at Which Impervious Surfaces Significantly Impact Aquatic Resources.....	3-11
3.2.4	General Disturbances to the Quality of Water at the Landscape Scale	3-12
3.2.5	General Disturbances to the Connectivity of Habitats at the Landscape Scale	3-13
3.2.6	Summary of Key Points	3-13
3.3	DISTURBANCES CAUSED BY AGRICULTURE.....	3-14
3.3.1	Changes in the Physical Structure within Wetlands Resulting from Agricultural Practices	3-14
3.3.2	Increased Amounts of Water in Wetlands Resulting from Agricultural Practices.....	3-16
3.3.3	Decreased Amounts of Water in Wetlands Resulting from Agricultural Practices	3-18
3.3.4	Increased Fluctuations of Water Levels in Wetlands Resulting from Agriculture	3-19
3.3.5	Increased Input of Sediment Resulting from Agriculture.....	3-19
3.3.6	Increased Input of Nutrients Resulting from Agriculture.....	3-20
3.3.7	Increased Input of Toxic Contaminants Resulting from Agriculture	3-21
3.3.8	Increased Levels of Salt Resulting from Agriculture.....	3-21
3.3.9	Reduced Connectivity (Fragmentation of Habitat) Resulting from Agriculture	3-22
3.3.10	Other Disturbances Resulting from Agriculture.....	3-22
3.3.11	Summary of Key Points.....	3-22
3.4	DISTURBANCES CAUSED BY URBANIZATION	3-23
3.4.1	Disturbances to the Physical Structure of Wetlands Resulting from Urbanization	3-24
3.4.2	Increased Amount of Water in Wetlands Resulting from Urbanization	3-24
3.4.2.1	Increased Frequency of Erosive Flows	3-25
3.4.2.2	Increased Volume of Runoff and Longer Duration of Flows	3-25
3.4.2.3	Consequences of Changes in Water Regime.....	3-26
3.4.3	Increased Fluctuations of Water Levels Resulting from Urbanization	3-27
3.4.4	Increased Input of Sediment Resulting from Urbanization.....	3-28
3.4.5	Increased Input of Nutrients Resulting from Urbanization	3-28
3.4.6	Increased Input of Toxic Contaminants Resulting from Urbanization	3-29
3.4.6.1	Heavy Metals and Hydrocarbons	3-29
3.4.6.2	Organic Matter and Pesticides.....	3-30
3.4.7	Reduced Connectivity (Fragmentation of Habitat) Resulting from Urbanization	3-30
3.4.7.1	Other Disturbances Resulting from Urbanization.....	3-31
3.4.8	Summary of Key Points	3-31
3.5	DISTURBANCES CAUSED BY LOGGING	3-32
3.6	DISTURBANCES CAUSED BY MINING.....	3-32
3.7	CHAPTER SUMMARY AND CONCLUSIONS	3-33

CHAPTER 4 IMPACTS OF HUMAN DISTURBANCES ON THE FUNCTIONS OF WETLANDS	4-1
 4.1 READER'S GUIDE TO THIS CHAPTER.....	4-1
4.1.1 Chapter Contents	4-1
4.1.2 Where to Find Summary Information and Conclusions.....	4-2
4.1.3 Data Sources and Data Gaps	4-3
 4.2 INTRODUCTION AND BACKGROUND ON THE SCALE OF IMPACTS TO WETLAND FUNCTIONS	4-4
 4.3 IMPACTS OF CHANGING THE PHYSICAL STRUCTURE WITHIN A WETLAND ...	4-5
4.3.1 Impacts of Changing the Physical Structure on Hydrologic Functions.....	4-5
4.3.2 Impacts of Changing the Physical Structure on Functions that Improve Water Quality	4-6
4.3.3 Impacts of Changing the Physical Structure within Wetlands on Plants	4-6
4.3.4 Impacts of Changing the Physical Structure on Habitat for Invertebrates	4-7
4.3.5 Impacts of Changing the Physical Structure on Habitat for Amphibians and Reptiles	4-8
4.3.6 Impacts of Changing the Physical Structure on Habitat for Fish	4-9
4.3.7 Impacts of Changing the Physical Structure on Habitat for Birds	4-9
4.3.8 Impacts of Changing the Physical Structure on Habitat for Mammals	4-10
4.3.9 Summary of Key Points.....	4-10
 4.4 IMPACTS OF CHANGING THE AMOUNT OF WATER IN WETLANDS	4-11
4.4.1 Impacts of Changing Amounts of Water on Hydrologic Functions	4-11
4.4.2 Impacts of Changing Amounts of Water on Functions that Improve Water Quality	4-11
4.4.3 Impacts of Changing Amounts of Water on Plants	4-12
4.4.4 Impacts of Changing Amounts of Water on Habitat for Invertebrates.....	4-14
4.4.4.1 Impacts of Reduced Amounts of Water on Habitat for Invertebrates	4-14
4.4.4.2 Impacts of Increased Amounts of Water on Habitat for Invertebrates	4-15
4.4.5 Impacts of Changing Amounts of Water on Habitat for Amphibians and Reptiles.....	4-15
4.4.6 Impacts of Changing Amounts of Water on Habitat for Fish.....	4-16
4.4.7 Impacts of Changing Amounts of Water on Habitat for Birds.....	4-17
4.4.7.1 Impacts of Reduced Amounts of Water on Bird Habitat	4-17
4.4.7.2 Impacts of Increased Amounts of Water on Bird Habitat	4-17
4.4.8 Impacts of Changing Amounts of Water on Habitat for Mammals	4-18
4.4.9 Summary of Key Points.....	4-18
 4.5 IMPACTS OF CHANGING THE FLUCTUATION OF WATER LEVEL WITHIN A WETLAND	4-18
4.5.1 Impacts of Changing Fluctuations in Water Levels on Hydrologic Functions	4-20
4.5.2 Impacts of Changing Fluctuations in Water Levels on Functions that Improve Water Quality	4-20
4.5.3 Impacts of Changing Fluctuations in Water Levels on Plants.....	4-20

4.5.4	Impacts of Changing Fluctuations in Water Levels on Habitat for Invertebrates	4-21
4.5.5	Impacts of Changing Fluctuations in Water Levels on Habitat for Amphibians and Reptiles	4-22
4.5.6	Impacts of Changing Fluctuations in Water Levels on Habitat for Fish.....	4-23
4.5.7	Impacts of Changing Fluctuations in Water Levels on Habitat for Birds ...	4-23
4.5.8	Impacts of Changing Fluctuations in Water Levels on Habitat for Mammals.....	4-24
4.5.9	Summary of Key Points.....	4-24
4.6	IMPACTS OF CHANGING THE AMOUNTS OF SEDIMENT	4-24
4.6.1	Impacts of Changing Amounts of Sediment on Hydrologic Functions.....	4-24
4.6.2	Impacts of Changing the Amount of Sediment on Functions that Improve Water Quality	4-25
4.6.3	Impacts of Changing the Amount of Sediment on Plants	4-25
4.6.4	Impacts of Changing Amounts of Sediment on Habitat for Invertebrates.....	4-26
4.6.5	Impacts of Changing Amounts of Sediment on Habitat for Amphibians and Reptiles	4-28
4.6.6	Impacts of Changing Amounts of Sediment on Habitat for Fish	4-28
4.6.7	Impacts of Changing Amounts of Sediment on Habitat for Birds	4-28
4.6.8	Impacts of Changing Amounts of Sediment on Habitat for Mammals	4-29
4.6.9	Summary of Key Points.....	4-29
4.7	IMPACTS OF INCREASING THE AMOUNT OF NUTRIENTS	4-29
4.7.1	Impacts of Increasing Amounts of Nutrients on Hydrologic Functions.....	4-30
4.7.2	Impacts of Increasing Amounts of Nutrients on Functions that Improve Water Quality	4-30
4.7.3	Impacts of Increasing Amounts of Nutrients on Plants	4-30
4.7.4	Impacts of Increasing Amounts of Nutrients on Habitat for Invertebrates.....	4-32
4.7.5	Impacts of Increasing Amounts of Nutrients on Habitat for Amphibians and Reptiles	4-33
4.7.6	Impacts of Increasing Amounts of Nutrients on Habitat for Fish	4-33
4.7.7	Impacts of Increasing Amounts of Nutrients on Habitat for Birds.....	4-34
4.7.8	Impacts of Increasing Amounts of Nutrients on Habitat for Mammals	4-34
4.7.9	Summary of Key Points.....	4-35
4.8	IMPACTS OF INCREASING THE AMOUNT OF TOXIC CONTAMINANTS	4-35
4.8.1	Impacts of Increasing Amounts of Toxic Contaminants on Hydrologic Functions	4-35
4.8.2	Impacts of Increasing Amounts of Toxic Contaminants on Functions that Improve Water Quality	4-35
4.8.3	Impacts of Increasing Amounts of Toxic Contaminants on Plants	4-36
4.8.4	Impacts of Increasing Amounts of Toxic Contaminants on Habitat for Invertebrates.....	4-36
4.8.4.1	Effects of Heavy Metals on Invertebrates	4-37
4.8.4.2	Effects of Pesticides, Oil, and Other Contaminants on Invertebrates	4-38

4.8.5	Impacts of Increasing Amounts of Toxic Contaminants on Habitat for Amphibians and Reptiles.....	4-40
4.8.6	Impacts of Increasing Amounts of Toxic Contaminants on Habitat for Fish.....	4-40
4.8.7	Impacts of Increasing Amounts of Toxic Contaminants on Habitat for Birds.....	4-41
4.8.8	Impacts of Increasing Amounts of Toxic Contaminants on Habitat for Mammals.....	4-43
4.8.9	Summary of Key Points.....	4-43
4.9	IMPACTS OF CHANGING ACIDITY	4-43
4.9.1	Impacts of Changing Acidity on Hydrologic Functions.....	4-43
4.9.2	Impacts of Changing Acidity on Functions that Improve Water Quality	4-43
4.9.3	Impacts of Changing Acidity on Plants.....	4-44
4.9.4	Impacts of Changing Acidity on Habitat for Invertebrates	4-44
4.9.5	Impacts of Changing Acidity on Habitat for Amphibians and Reptiles.....	4-47
4.9.6	Impacts of Changing Acidity on Habitat for Fish	4-48
4.9.7	Impacts of Changing Acidity on Habitat for Birds.....	4-48
4.9.8	Impacts of Changing the Acidity on Habitat for Mammals	4-48
4.9.9	Summary of Key Points.....	4-48
4.10	IMPACTS OF INCREASING THE CONCENTRATIONS OF SALT.....	4-49
4.10.1	Impacts of Increasing Concentrations of Salt on Hydrologic Functions	4-49
4.10.2	Impacts of Increasing Concentrations of Salt on Functions that Improve Water Quality	4-49
4.10.3	Impacts of Increasing Concentrations of Salt on Plants.....	4-50
4.10.4	Impacts of Increasing Concentrations of Salt on Habitat for Invertebrates	4-51
4.10.5	Impacts of Increasing Concentrations of Salt on Habitat for Amphibians and Reptiles	4-51
4.10.6	Impacts of Increasing Concentrations of Salt on Habitat for Fish	4-51
4.10.7	Impacts of Increasing Concentrations of Salt on Habitat for Birds	4-52
4.10.8	Impacts of Increasing Concentrations of Salt on Habitat for Mammals ...	4-53
4.10.9	Summary of Key Points	4-53
4.11	IMPACTS OF DECREASING THE CONNECTION BETWEEN HABITATS	4-53
4.11.1	Impacts of Decreasing the Connection Between Habitats on Hydrologic Functions	4-54
4.11.2	Impacts of Decreasing the Connection Between Habitats on Functions that Improve Water Quality	4-54
4.11.3	Impacts of Decreasing the Connection Between Habitats on Plants.....	4-55
4.11.4	Impacts of Decreasing the Connection Between Habitats on Invertebrates	4-55
4.11.5	Impacts of Decreasing the Connection Between Habitats on Amphibians and Reptiles.....	4-55
4.11.5.1	Amphibians	4-55
4.11.5.2	Reptiles.....	4-58

4.11.6 Impacts of Decreasing the Connection Between Habitats on Fish	4-58
4.11.7 Impacts of Decreasing the Connection Between Habitats on Birds.....	4-59
4.11.8 Impacts of Increasing Connections Between Habitats on Mammals	4-61
4.11.9 Summary of Key Points	4-61
4.12 IMPACTS OF OTHER HUMAN DISTURBANCES	4-62
4.12.1 Impacts of Altering Soils on Plant Communities.....	4-62
4.12.2 Impacts of Roads on Wildlife.....	4-63
4.12.3 Impacts of Noise on Wildlife	4-64
4.12.4 Impacts of Recreational Activities on Wildlife and Plant Communities	4-66
4.12.5 Impacts of Invasion by Exotic Species.....	4-67
4.12.5.1 Impacts of Exotic and Invasive Plants in Wetlands	4-68
4.12.5.2 Impacts of Domestic Pets.....	4-68
4.12.5.3 Impacts of Exotic Wildlife	4-69
4.12.5.4 Impacts of Exotic Invertebrates in Wetlands	4-69
4.12.5.5 Impacts of Exotic Amphibians in Wetlands.....	4-70
4.12.5.6 Impacts of Exotic Fish in Wetlands	4-71
4.12.6 Summary of Key Points	4-71
4.13 CHAPTER SUMMARY AND CONCLUSIONS	4-72

CHAPTER 5 THE SCIENCE AND EFFECTIVENESS OF WETLAND MANAGEMENT TOOLS.....	5-1
5.1 READER'S GUIDE TO THIS CHAPTER	5-1
5.1.1 Chapter Contents	5-1
5.1.2 Where to Find Summary Information and Conclusions.....	5-2
5.1.3 Data Sources and Data Gaps	5-2
5.2 INTRODUCTION AND BACKGROUND ON REGULATORY TOOLS	5-3
5.3 HOW WETLANDS ARE DEFINED AND DELINEATED	5-4
5.3.1 How Agencies Define Wetlands.....	5-4
5.3.2 Biological vs. Regulated Wetlands.....	5-5
5.3.3 Small Wetlands.....	5-7
5.3.3.1 Amphibians and Small Wetlands	5-8
5.3.3.2 Birds and Small Wetlands	5-9
5.3.3.3 Mammals and Small Wetlands.....	5-9
5.3.4 Isolated Wetlands	5-10
5.3.5 Delineation Methods.....	5-11
5.3.6 Summary of Key Points.....	5-12
5.4 WETLAND RATING SYSTEMS.....	5-13
5.4.1 Other Characteristics Used for Rating.....	5-15
5.4.1.1 Bogs.....	5-16
5.4.1.2 Alkali Wetlands.....	5-18
5.4.1.3 Mature and Old-Growth Forested Wetlands	5-19
5.4.1.4 Vernal Pools	5-19
5.4.1.5 Natural Heritage Wetlands	5-19
5.4.2 Summary of Key Points.....	5-20

5.5 BUFFERS.....	5-20
5.5.1 Terms Used to Describe Buffers	5-21
5.5.2 Functions Provided by Buffers	5-22
5.5.3 Buffers and Protection of Water Quality	5-25
5.5.3.1 Removing Sediment	5-26
5.5.3.2 Removing Nutrients	5-29
5.5.3.3 Removing Toxics and Pathogens	5-32
5.5.3.4 Maintaining Microclimate.....	5-33
5.5.3.5 Summary of Key Points	5-34
5.5.4 Buffers and Wildlife Habitat	5-35
5.5.4.1 Maintaining Terrestrial Habitat Adjacent to Wetlands	5-36
5.5.4.2 Screening Adjacent Disturbances.....	5-43
5.5.4.3 Maintaining Habitat Connections.....	5-44
5.5.4.4 Summary of Key Points	5-45
5.5.5 Buffer Maintenance and Effectiveness over Time	5-45
5.5.5.1 Human Alteration to Buffers.....	5-46
5.5.5.2 Loss of Trees to Blowdown	5-46
5.5.5.3 Reduced Capacity for Sediment/Nutrient Removal	5-46
5.5.5.4 Summary of Key Points	5-47
5.5.6 Summary of Buffer Ranges and Characteristics from the Literature	5-47
5.5.6.1 Summary of Key Points	5-51
5.6 CHAPTER SUMMARY AND CONCLUSIONS	5-52

CHAPTER 6 THE SCIENCE AND EFFECTIVENESS OF WETLAND MITIGATION.....	6-1
6.1 READER'S GUIDE TO THIS CHAPTER	6-1
6.1.1 Chapter Contents	6-1
6.1.2 Where to Find Summary Information and Conclusions.....	6-2
6.1.3 Data Sources and Data Gaps	6-3
6.2 INTRODUCTION AND BACKGROUND TO WETLAND MITIGATION.....	6-4
6.2.1 Wetland Mitigation Sequence	6-4
6.2.2 The Emergence of Compensatory Wetland Mitigation.....	6-6
6.3 SUCCESS OF COMPENSATORY MITIGATION WETLANDS.....	6-7
6.3.1 Results of Literature Studies.....	6-7
6.3.2 Summary of Key Points.....	6-9
6.4 COMPLIANCE WITH PERMIT REQUIREMENTS	6-9
6.4.1 Compliance Overall.....	6-10
6.4.2 Project Installation.....	6-13
6.4.3 Installation According to Plan	6-14
6.4.4 Establishment of Wetland Acreage	6-15
6.4.5 Attainment of Goals, Objectives, and Performance Standards	6-17
6.4.6 Monitoring.....	6-18
6.4.7 Maintenance.....	6-19
6.4.8 Regulatory Follow-Up.....	6-20
6.4.9 Summary of Key Points.....	6-21

6.5 TYPES OF COMPENSATORY MITIGATION	6-22
6.5.1 Restoration.....	6-23
6.5.1.1 Use of Restoration.....	6-24
6.5.1.2 Effectiveness of Restoration.....	6-24
6.5.2 Creation	6-25
6.5.2.1 Use of Creation.....	6-25
6.5.2.2 Effectiveness of Creation	6-25
6.5.3 Enhancement/Exchange.....	6-26
6.5.3.1 Use of Enhancement.....	6-27
6.5.3.2 Effectiveness of Enhancement	6-27
6.5.4 Preservation	6-28
6.5.4.1 Use of Preservation	6-29
6.5.4.2 Effectiveness of Preservation	6-29
6.5.5 Mixed Compensatory Mitigation.....	6-29
6.5.5.1 Use of Mixed Compensation Projects	6-30
6.5.5.2 Effectiveness of Mixed Compensation Projects.....	6-30
6.5.6 Wetland Mitigation Banking	6-30
6.5.6.1 Use of Wetland Banking	6-30
6.5.6.2 Effectiveness of Wetland Mitigation Banks.....	6-31
6.5.7 In-Lieu Fee Programs	6-31
6.5.7.1 Use of In-Lieu Fee Programs	6-31
6.5.7.2 Effectiveness of In-Lieu Fee Programs	6-32
6.5.8 Summary of Key Points.....	6-32
6.6 REPLACEMENT RATIOS	6-34
6.6.1 Rationale for the Use of Replacement Ratios.....	6-35
6.6.2 Replacement Ratios Required and Achieved	6-36
6.6.3 Approaches for Determining Replacement Ratios	6-37
6.6.4 Summary of Key Points.....	6-40
6.7 REPLACEMENT OF WETLAND ACREAGE	6-40
6.7.1 Programmatic Evaluations of Acreage Replacement	6-41
6.7.2 Project-Specific Evaluations of Acreage Replacement	6-43
6.7.3 Summary of Key Points.....	6-44
6.8 FUNCTIONS AND CHARACTERISTICS PROVIDED BY CREATED, RESTORED, OR ENHANCED WETLANDS	6-44
6.8.1 Wildlife Habitat	6-45
6.8.1.1 Invertebrates	6-45
6.8.1.2 Amphibians	6-45
6.8.1.3 Birds/Waterfowl	6-46
6.8.2 Plants	6-47
6.8.2.1 Comparisons with Reference Wetlands	6-47
6.8.2.2 Cowardin Classes Provided by Compensatory Mitigation Wetlands ..	6-48
6.8.2.3 Factors Affecting Plants	6-50
6.8.3 Soil Characteristics	6-52
6.8.4 Water Quality	6-54
6.8.4.1 Comparison of Water Quality at Created and Reference Wetlands....	6-54
6.8.4.2 Sediment Removal	6-54

6.8.4.3	Nutrient Removal	6-55
6.8.5	Water Quantity	6-56
6.8.5.1	Using Hydrogeomorphic (HGM) Classification to Study Water Regime at Mitigation Sites	6-56
6.8.6	Summary of Key Points.....	6-57
6.9	REPRODUCIBILITY OF PARTICULAR WETLAND TYPES.....	6-59
6.9.1	Bogs and Fens.....	6-59
6.9.2	Vernal Pools	6-60
6.9.3	Alkali Wetlands	6-61
6.9.4	Mature Forested Wetlands.....	6-61
6.9.5	Summary of Key Points.....	6-61
6.10	SUGGESTIONS FROM THE LITERATURE FOR IMPROVING COMPENSATORY MITIGATION	6-61
6.10.1	Regulatory Improvements	6-62
6.10.2	Improving Site Selection and Design.....	6-63
6.10.3	Improving Implementation	6-65
6.10.4	Performance Standards.....	6-65
6.10.4.1	Shortcomings of Existing Performance Standards.....	6-66
6.10.4.2	Use of Reference Wetlands in Developing Performance Standards	6-67
6.10.4.3	Longer Period Needed to Evaluate Projects.....	6-68
6.10.5	Compensatory Mitigation Using a Watershed/Landscape Approach	6-68
6.10.5.1	Methods for Implementing a Landscape Approach	6-69
6.10.6	Mitigation Banking.....	6-70
6.10.7	Summary of Key Points	6-71
6.11	CHAPTER SUMMARY AND CONCLUSIONS	6-72

CHAPTER 7	CUMULATIVE IMPACTS ON WETLANDS.....	7-1
7.1	READER'S GUIDE TO THIS CHAPTER.....	7-1
7.1.1	Chapter Contents	7-1
7.1.2	Where to Find Summary Information and Conclusions.....	7-2
7.1.3	Data Sources	7-2
7.2	INTRODUCTION AND BACKGROUND ON WETLAND LOSS AND CUMULATIVE IMPACTS.....	7-2
7.3	IMPLICATIONS OF CURRENT MANAGEMENT PRACTICES FOR CUMULATIVE IMPACTS.....	7-5
7.4	CUMULATIVE IMPACTS ARE DIFFICULT TO ASSESS	7-6
7.4.1	Summary of Key Points.....	7-9
7.5	ASSESSING AND PLANNING FOR CUMULATIVE IMPACTS	7-9
7.5.1	Planning Approaches Using a Landscape Perspective	7-10
7.5.2	Landscape-Scale Planning and Restoration.....	7-13
7.5.3	Summary of Key Points.....	7-16
7.6	CHAPTER SUMMARY AND CONCLUSIONS	7-16

Appendix B References Cited Characteristics Of A Valid Scientific Process **B 1-2**

Appendix C Methods used for Searching and Reviewing the Literature **C 1-5**

Appendix D Reviewers of Volume 1 **D 1**

Appendix E Methods for Organizing and Grouping Wetland Information..... **E 1-2**

List of Tables

Table 2-1. Different ways of dividing wetland functions.....	2-6
Table 2-2. Environmental factors that have been identified as controls of functions in wetlands.....	2-13
Table 2-3. Characteristics of wetland classes in the hydrogeomorphic classification..	2-17
Table 2-4. Subclasses and families of wetlands in different regions of Washington State	2-25
Table 2-5. Functions performed by wetlands in different HGM classes in Washington.....	2-29
Table 3-1. Summary of human disturbances and the scale at which they can occur....	3-6
Table 3-2. Summary of findings on the impacts of impervious cover.....	3-12
Table 3-3. Disturbances resulting from different land use practices that can change the factors that control wetland functions.	3-35
Table 4-1. Summary of studies on effects of contaminants on invertebrates.	4-39
Table 4-2. Summary of studies describing relative tolerance of invertebrates to acidification.	4-45
Table 4-3. Disturbances resulting from different land use practices that can change the factors that control wetland functions.	4-74
Table 4-4. Synthesis of the information reported in the literature on the impact of different human disturbances on wetland functions.	4-75
Table 4-5. Synthesis of the impacts of different land uses on wetland functions.....	4-76
Table 5-1. Summary of studies on sediment control provided by buffers of various widths.....	5-29
Table 5-2. Summary of studies on nutrient removal provided by buffers of various widths.....	5-31
Table 5-3. Summary of studies on pathogen control provided by buffers of various widths.....	5-33
Table 5-4. Summary of studies on the influence of microclimate provided by buffers of various widths.....	5-34
Table 5-5. Summary of studies on wildlife habitat provided by buffers.	5-41
Table 5-6. Summary of studies on screening provided by buffers.	5-44
Table 5-7. Summary of recommendations for buffer dimensions from the literature..	5-48
Table 5-8. A summary of pollutant removal effectiveness and wildlife habitat value of vegetated buffers according to buffer width (Desbonnet et al. 1994).	5-49
Table 6-1. Literature sources and corresponding reference numbers.	6-4
Table 6-2. Results of studies examining the success of compensatory mitigation.....	6-8

Table 6-3. Level of overall compliance of compensation projects.....	6-11
Table 6-4. Percent of compensatory mitigation projects that were installed.....	6-13
Table 6-5. Percent of compensatory mitigation projects installed according to plan... ..	6-15
Table 6-6. Establishment of required wetland acreage.....	6-16
Table 6-7. Attainment of goals, objectives, and performance standards	6-18
Table 6-8. Percent of projects requiring monitoring and those actually monitored.	6-19
Table 6-9. Comparison of replacement ratios that were required and achieved.....	6-37
Table 6-10. Permitted wetland loss compared to required wetland compensation.....	6-42
Table 6-11. Suggestions from the literature for regulatory improvement.	6-63
Table 6-12. Suggestions from the literature for improving site selection and design. .	6-64
Table 6-13. Suggestions from the literature for improving implementation.	6-65

List of Figures

Figure 2-1.	A model of the environmental factors that control wetland functions.....	2-10
Figure 2-2.	Process-structure-function model.....	2-11
Figure 2-3.	Diagram summarizing the environmental factors that control functions of wetlands and how they interact with human disturbance.....	2-14
Figure 2-4.	Regions in Washington used for classifying wetlands.....	2-20
Figure 2-5.	Riverine wetlands are located in active floodplains where overbank flooding of the river or stream structures the wetland ecosystem and controls its functions.....	2-21
Figure 2-6.	Depressional wetlands are located in topographic low areas that are closed on at least three sides.....	2-22
Figure 2-7.	Slope wetlands are located on slopes where groundwater daylights and runs at or just below the soil surface.....	2-23
Figure 2-8.	Lacustrine fringe wetlands are found along the edge of large bodies of water.....	2-24
Figure 2-9.	Slope wetland in the Columbia Basin that formed at a break in the slope.....	2-32
Figure 2-10.	Features of a wetland that increase structural complexity.....	2-49
Figure 2-11.	Depressional wetland in the Columbia Basin showing a structurally complex ecosystem in a terrestrial environment with low complexity.....	2-50
Figure 2-12.	The number of reptile and amphibian species found in riparian and herbaceous wetlands in Washington and Oregon	2-51
Figure 2-13.	The number of bird species found in riparian and herbaceous wetlands in Washington and Oregon	2-52
Figure 2-14.	The number of mammal species found in riparian and herbaceous wetlands in Washington and Oregon	2-53
Figure 3-1.	Diagram summarizing the environmental factors that control functions of wetlands and how they interact with human disturbances.	3-5
Figure 3-2.	Changes in the proportion of groundwater, interflow, evapotranspiration, and surface runoff with different types of land cover.....	3-10

Acknowledgements

Many hours of painstaking work by dedicated experts went into the production of this document. The Core Team (listed in Appendix A) persistently guided us through numerous challenges and did the bulk of the work by gathering and reading articles, dealing with problems with the database, and crafting and re-crafting the framework for the document. Katherine March also searched the public databases, generating long lists of articles to be considered for the synthesis. Kim Harper accepted the difficult challenge of managing the database.

The authors and other members of the Core Team spent countless hours reading and summarizing articles and writing and re-writing text. Of special note is Tom Hruby whose knowledge of the literature and ability to translate scientific concepts into lay terms results in his valuable technical writing skills and contribution to many chapters. Also of special note is the dedication and time spent by Dyanne Sheldon in the production of this document. She donated many hours of her own time toward the project, often burning the midnight oil to make sure articles were read and text written. Patricia Johnson deserves kudos for her work sifting through the voluminous information on compensatory mitigation and presenting it in a thorough yet easy to read manner.

Sara Noland, our chief editor, is to be complimented for her excellent editing skills. Editing this document has been a real challenge with the numerous authors involved, each with a different writing style, and the changes that were initiated relatively late in the production process. We thank her sincerely for her patience and flexibility.

Tom Noland provided invaluable assistance in scanning and converting graphics into a format suitable for publication, as well as patiently trouble-shooting computer problems.

Thanks also to Mary Lynum for her role as support staff for the project, Keren Marzi for her work on the cover, and Tim Schlender for developing the web site and posting the document on the site.

The document and this effort as a whole were the vision of Andy McMillan who also obtained the funding from several sources and pitched in to help with some of the writing.

Finally, acknowledgement must be given to Teri Granger, the project manager. Teri coordinated every aspect of the project, facilitated meetings, provided encouragement to the authors, assisted with the editing, and managed external communications while working part time.

This document would never have been produced had it not been for the financial backing provided by the U.S. Environmental Protection Agency. The Washington Departments of Ecology and Fish and Wildlife also contributed to the funding for this project. We thank the agencies for their support in undertaking such an ambitious endeavor.
